ANKIT SHARMA

AutoCAD Draftsman | Mechanical Draftsman | SolidWorks CAD Modeler

Hamirpur, Himachal Pradesh, India | +91 8219706187 | ankitsharmaa0710@gmail.com | linkedin.com/in/ankit-cad
Portfolio: https://ankitsharma03.netlify.app

PROFESSIONAL SUMMARY

Mechanical Draftsman and CAD Modeler with hands-on experience in AutoCAD 2D drafting and SolidWorks 3D part modeling, gained through CAD Engineering and modeler roles since September 2025. Experienced in preparing 2D technical drawings and layouts for manufacturing, converting 2D sketches and reference images into 3D models, and generating standard drawing views. Strong grounding in orthographic projection (first and third angle) and technical drawing interpretation. Holds a B.E. in Mechanical Engineering and is pursuing a master's degree in mechanical engineering. Seeking AutoCAD Draftsman and mechanical drafting opportunities in the GCC region.

TECHNICAL SKILLS

- **Drafting:** 2D Drafting, Technical Drawings, 2D Production Drafting, Component Detailing, Layout Design, Drawing Views (Top, Front, Side, Isometric), Orthographic Projection (First/Third Angle), Technical Blueprint Reading
- **Modeling:** 3D Part Modeling, 2D-to-3D Component Conversion, SolidWorks Sketch Definition, Mechanical Design, NX CAD (Basics)
- **Other:** Preparing practice drawings and modeling exercises, reviewing and correcting design errors, drafting speed and accuracy, Conceptual Space Planning, 2D Architecture Drafting and Detailing, Custom Floor Plan Design, 2D to 3D Architectural Conversion in Revit.

SOFTWARE

- **AutoCAD (2D):** used for 2D drawings and layouts for manufacturing; taught as a trainer (Sep 2025 – present)
- **SolidWorks:** used for 3D part modeling, sketches and drawing views (Sep 2025 – present)

PROFESSIONAL EXPERIENCE

CAD Engineer & Mechanical Modeler March 2026 – Present
Techcadd | Sahibzada Ajit Singh Nagar, Punjab, India

- Create accurate 3D mechanical parts (gears, brackets, and other components) in SolidWorks from 2D sketches and reference images.
- Prepare clear 2D drawings and layouts for manufacturing in AutoCAD.
- Generate standard drawing views (Top, Front, Side, Isometric) from 3D models.
- Demonstrate software commands (Extrude, Revolve, Cut) and correct design errors for students.

Mechanical CAD Engineer September 2025 – February 2026
PG Tech Solutions | Punjab, India

- Delivered practical AutoCAD (2D) and SolidWorks training to engineering students.
- Created mechanical practice drawings and 3D modeling exercises for daily batches.
- Taught orthographic projections (first and third angle) and the reading of technical blueprints.
- Helped students improve drafting speed and accuracy in mechanical design tools.

Mechanical Engineering Intern, Assembly Department January 2025 – June 2025
Sonalika Industries (A Unit of ICML) | Amb, Himachal Pradesh, India

- Rotated through the Weld Shop, Paint Shop (ED coating) and Final Assembly Line, observing the full production flow.
- Observed welding of chassis and sheet metal components and the ED painting process used for rust protection.
- Observed final assembly of tractors, including how painted parts, engines and transmissions are integrated.

EDUCATION

Master of Engineering, Mechanical Engineering (Pursuing)2025 – 2027
Bahra University

Bachelor of Engineering, Mechanical Engineering2021 – 2025
Bahra University

Senior Secondary (10+2), non-medical2020 – 2021
Govt. High School Bijhari | HPBOSE
